

HDS8/174M High Pressure Cleaner

Hot, Cold & Steam Cleaning to 155°C

CODE: KHDS8/17

Features

1. Environmental protection

Greater efficiency with the new ECO mode, service switch for controlling water hardness, turbo fan, precision detergent metering, optimized burner technology and a high-efficiency pump.

2. User friendliness

This is ensured by a central, clearly arranged control panel designed for intuitive operation, a spray lance holder, LED display, and much more.

3. Cleaning performance

Highly efficient cleaning is guaranteed by patented nozzle technology, ceramic pistons, turbo fan as well as increased pump efficiency. Accessories are optimized for specific applications and designed to exactly suit customer requirements.

4. Mobility

The mobility concept features one caster, large rubber-tyred wheels, ergonomic handles, lifting points for handling with a forklift, lashing rings and a recessed tread for tilting the machine to guarantee maximum manoeuvrability.

5. Reliability

Guaranteed by flue gas monitoring, a corrosion-proof, robust chassis, machine protector system, three-piston axial pump with ceramic pistons, heat resistant flue outlet, 4 pole motor.

6. Service friendliness

Easy access to all components that require servicing and a service switch to call up operating data at any time for troubleshooting.

Up to 155 deg C

Operating PSI:	435 -2465 psi
Flow Rate:	6.7-13.3 litre / min
Power Rating:	240 Volt 3 phase 5.5 kW 15 Amp
Tanks:	Fuel 25 litre Detergent 20 and 10 litre
Weight:	155 Kg

Standard Accessories:

10 m braided steel hose, 1050mm stainless lance, power nozzle
