

MAXI FOAM

Innovative Foam Cleaning System

CODE: SAN010

The cleaning process is carried out through four stages:

1. Spraying of the detergent foam on the surfaces to be cleaned (walls, sanitary fixtures and panes)
2. Foam chemical action
3. Rinsing with fresh water
4. Vacuuming of residual water

Advantages of the Maxi-Foam System:

- Saving time in the cleaning of a room thanks to the foams capacity of acting on the dirt more efficiently than a normal solution of water and detergent. While foam acts on the walls where it has been sprayed, the operator is free to operate on other surfaces.
- Better cleaning result: the prolonged foam action assures the most effective cleaning on all surfaces.
- Detergent saving: the chemical is used without waste.
- Reduced power consumption: the machine requires little electrical power and therefore it can be used in any location.

Sweepers

Polishers

Carpet Cleaners

Advantages of the Maxi-Foam System continued:

- Reduced water consumption: the foam + rinse system requires a minimal quantity of water. This avoids the flooding of surfaces, allows a longer working autonomy and offers the immediate availability of the areas that have been cleaned.
- Reduced labour for the operator: the manual labour is reduced to a minimum since the removal of the dirt is carried out through the system foam + rinse.
- The greatest hygienic safety for the operator, who does not come into contact with the surfaces and the objects to be cleaned. The cleaning is therefore more comfortable and more hygienic for the operator.

| Technical Data | |
|--|---|
| Recovery tank capacity: | 30 litres |
| Solution tank capacity: | 30 litres |
| Tank construction: | High density polyethylene |
| Vacuum motor: | 2 stages |
| Power: | 1200 W |
| Maximum depression: | 2300 mm H2O |
| Maximum air-flow: | 60 l/sec. |
| Pump with by-pass: | membrane, with internal bypass |
| Power: | 80 W |
| Maximum pressure: | 9 bar |
| Maximum water-flow: | 4.5 l/min. |
| Compressor: | 350 W |
| Cable length: | 10 m |
| Weight: | 62 Kg |
| Dimensions: | 38 x 80 cm, h=105 cm |
| Package dimensions: | 60 x 95 cm, h=117 cm |
| Hoses length: | 5 m |
| Approximate performance and consumption: (room with 24 sq. meters + 6 sanitary fixtures) | Time: 8 minutes (2 foam + 6 rinse) Detergent consumption: 400 g Water consumption: 15.5 litres |

Standard accessories supplied with the machine: Foaming lance, accessory for rinsing, floor wiper with extension, window squeegee, wet vacuum tool.

Detergent: Special foaming detergent, two 5-litre tanks supplied with the machine.

Other Features of Maxi-Foam:

- The machine is compact and mobile with all accessories located on the machine, so they can be easily carried and are ready to use.
- The filling with fresh water and the discharge of dirty water are carried out easily thanks to long hoses.
- The control/regulation panel is handy and the controls are simple and intuitive.
- The tank containing pure detergent is placed in a special compartment and the quantity of detergent sucked by the machine can be regulated.
- Clear control panel allows simple switching from the foam spraying phase to the rinsing phase as well as the control the quantity and the density of foam sprayed.
