Available IRIS® Asset Manager

# Engineered for Productivity

**1. MaxPro™** sweeping technology provides consistent power to the main brush to deliver consistent cleaning results across various surfaces and debris types.

**2. Multi-stage filtration system** with a powerful filter shaker system maintains air quality by effectively containing dust during the sweeping process.

**3. Powered high-dump configuration** eliminates the need to manually handle debris and enables you to place larger debris into the hopper for later disposal.

**4. Manual low-dump configuration** with VarioHeight™ handle increases ease of dumping debris for various operators.

**5. Operate easily** with backlit controls featuring a 1-Step™ start button that simplifies training and ensures consistent cleaning performance.

**6. Eco-Mode™** extends runtime and allows for anytime cleaning with reduced noise levels.

## Optional Accessories

Increase safety and effective operation in the most severe environments with an optional **FOPs certified overhead guard**.

Clean off aisle and in tight spaces with the convenient optional **dry vacuum wand**.
